

## Destry Darr Designs

*Form and function, exquisite design and first-class service*

**D**estry Darr Designs, Inc., headed by Florida native Destry Darr Pethtel, has its roots in an intimate knowledge of the luxury yacht world. Pethtel draws on her family legacy to provide a comprehensive menu of yacht interior design services. Prior to founding her firm, Destry refined her skills as an interior designer for several world-class, well-known yacht interior design firms.

With no limitations on design style or approach, Destry works with her clients from concept to completion. For Destry Darr Pethtel and her design team, the keyword is balance: "By blending the exotic woods and luxurious fabrics we select together with our clients with design approach that is both individual and innovative design, we can create a rich sophisticated look, and still have a casual, relaxed feeling."

Currently, Destry and her team are engaged in a wide variety of projects. These address an impressive array of clients in a wide scope of locations, nationally and internationally. The firm seamlessly manages multiple project completion schedules on privately owned vessels, while continuing to develop custom high-end interiors for leading yacht builders around the world. "We like to think of ourselves as offering the 'Total Creative Solution' for yachts, as well as residential,

interiors," Destry says. "That may involve creating a concept totally from scratch or implementing a client's ideas in the most effective way. We work with each client, keeping in mind the requisites of quality, comfort, continuity and most important, functionality. The result is a look that satisfies the client's desires, while fully respecting and optimizing their budget." Destry believes that "form follows function" are the most important words in yacht interior design. She also insists on a superior level of personalized attention for her clients.

The company's primary focus is interior design services and consulting for the yacht and the home. The process begins with a consultation and further progresses to the selection of

components that are harmonious with a selected design theme. All aspects of the interior installation are fully supervised. This expertise-driven approach is complemented by carefully sourced furniture, art and accessories.

True to the "form follows function" philosophy, the firm defines its products and services in a clear and comprehensive fashion. These include: unique consulting services or full design and décor services; room and furniture layouts; Auto Cad drafting and free-hand conceptual renderings; concepts for custom cabinetry and furniture, window treatments and soft décor; selection, coordination, purchase and resale of surface treatments, furniture, fabrics, art and accessories with product choices specifically chosen for each individual client project; project management including coordination, direction and supervision of suppliers and sub-contractors.

Destry Darr Pethtel's perspective on her work and her firm are equally clear. "We are the resource for those who desire custom interior design and decor ideas and products. Each client receives excellent personal service and support as well as overall quality of the experience and end result." ■
